

## All Rotax Max Classes Carburettor Dell'orto VHSB 34 QD & QS

All carburettors used in the Rotax Max classes must use the standard 150 float needle valve set as supplied by Rotax.

The set consists of the following parts:

Needle valve seat: Must be marked 150

Inlet needle: Must be sprung loaded type with Viton tip and must be marked with the diamond INC logo. No additional marking permitted.

Fibre sealing washer
